01

What is STARFORGE?

STARFORGE is an AI-powered character creation engine built for Star Wars fans who want to create their own original characters and tell their own stories in the galaxy.

You are not recreating existing characters. You are forging something completely new — your own species, your own role, your own homeworld, your own weapon, your own story. STARFORGE gives you the tools to bring that character to life across multiple formats: images, video, music, lore, and a collectible card.

Built by a Star Wars fan, for Star Wars fans. Every detail — from the 47 planets to the 60+ original names to the IP-safe image prompts — was designed with one goal: to give you the most powerful fan character creation tool in existence.

WHO IS STARFORGE FOR?

- Star Wars fans who want to create original characters
- Content creators building TikTok, Instagram, and Reddit content
- Fan fiction writers who want deep lore and story arcs
- Collectors who want a unique downloadable character card
- Anyone who has ever imagined their own place in the galaxy

02 Getting Started

Your first character in 3 steps.

STEP 1

Fill in the Generator Fields

Each field shapes a different aspect of your character. Fill in as many or as few as you like. Every field has a dropdown with curated options — or leave fields empty and let STARFORGE choose for you.

STEP 2

Hit Generate or Surprise Me

Generate uses your exact selections. Surprise Me randomizes everything and picks one of 20 themed presets — each designed to produce a specific visual and narrative style. Surprise Me is the fastest way to see what STARFORGE can do.

STEP 3

Use Your Outputs

Once generated, all your outputs appear on screen. Copy any output with one click. Use them in ChatGPT for images, CapCut for video, Suno for music, or post your caption directly to TikTok or Instagram.

□ **Pro Tip:** Use Surprise Me first — it's the fastest way to discover great character combinations you wouldn't have picked yourself.

03 Generator Fields

Every field and what it controls.

First Name / Last Name

60+ original invented names — none from existing SW characters. Or type your own custom name.

Species

26 species — all described in IP-safe physical terms in the outputs.

Role

30+ roles from Jedi to Bounty Hunter to Mandalorian Warrior. Shapes lore and scene outputs.

Homeworld

47 planets — described by their physical environment in outputs, never by their SW name.

Weapon

From single energy blades to ancestral spears to blaster rifles. Shapes pose and combat descriptions.

Art Style

Controls visual aesthetic — Hyper-Realistic, Ghibli-Inspired, 3D Render, Retro 80s and more.

Color Palette

20 color directions from Neon Cyberpunk to Blood Crimson to Sacred Gold.

Lighting

10 setups from Dark Cinematic to Golden Hour to Neon Glow.

Camera Angle

Controls framing — Hero Shot, Low Angle, Close-Up, Extreme Wide Shot and more.

Render Mode

Sets image intent — Character Card, Poster Art, Cinematic Scene, or Character Design.

Background Type

Transparent, Solid Color, Gradient, Studio Backdrop, or Cinematic Environment.

Lore Tone

Cinematic for deep storytelling. Punchy Social for viral-style short outputs.

Precision Mode

High Precision adds extra anatomy and quality constraints to the image prompt.

Output Format

Sets aspect ratio and platform intent — TikTok 9:16, Instagram 1:1, Poster 2:3 and more.

Pose

Controls body language and stance in the image prompt.

04

The 9 Outputs

3 free outputs. 6 unlocked with Creator.

FREE — ALWAYS AVAILABLE

AI Image Prompt

A fully formatted, ready-to-use image generation prompt. Built from your exact selections — species, role, planet, weapon, art style, lighting, camera, color palette — all translated into IP-safe language. Copy and paste into ChatGPT, Gemini, Midjourney, or any AI image tool.

Caption + Hashtags

A cinematic social media caption with an engagement question and optimized hashtags. Ready to copy and paste to TikTok or Instagram. No editing needed.

Suno Music Prompt

A detailed music generation prompt for Suno.com. Describes mood, genre, instrumentation, and energy level. Paste into Suno to generate a custom soundtrack for your character.

CREATOR — CA\$8/MONTH

Video Script

A structured video script for TikTok, Reels, or Shorts. Includes a hook, scene order, and ending beat. Use in CapCut with text overlays or voiceover.

AI Video Prompt

A cinematic motion description for AI video tools like Pika, Runway, or Kling. Written as one continuous sequence describing camera movement, character action, and atmosphere.

Character Lore

AI-written origin story — unique every time, powered by Claude AI. Covers background, motivation, defining moment, and place in the galaxy. Use the Regenerate button for a fresh version.

Cinematic Scene

AI-written scene description — a dramatic moment in your character's story. Sets location, atmosphere, tension, and action. Perfect for fan fiction or social captions.

Ally / Rival

AI-written profiles of your character's closest ally and most dangerous rival — names, roles, relationship dynamics, and how they connect to your character's story.

Story Arc

AI-written three-act story arc — beginning, conflict, and resolution. A complete narrative framework you can expand into full fan fiction or a creative project.

05

Getting Your Image

STARFORGE generates the prompt — you take it to an AI image tool.

THE RECOMMENDED WORKFLOW

1. Generate your character in STARFORGE
2. Copy the AI Image Prompt
3. Open ChatGPT (chatgpt.com)
4. Paste the prompt and generate
5. Run it 2-4 times and pick the best result
6. Save the image
7. Upload to Forge Your Card

WHICH AI IMAGE TOOL TO USE

ChatGPT

BEST overall results. Follows STARFORGE prompts closely. Strong character design and cinematic styling. Free tier available.

Midjourney

Excellent quality but requires Discord. Great for poster-style outputs.

Leonardo.ai

Also outputs real transparent PNGs natively. Good for character card backgrounds.

Gemini

Good results but less consistent than ChatGPT with complex prompts. Worth trying if ChatGPT is unavailable.

Adobe Firefly

Best option if you need a TRUE transparent background PNG without removing it manually.

❑ **Transparent Background:** STARFORGE prompts request a bright green background for easy removal in Canva. For a true transparent PNG: use Adobe Firefly or Leonardo.ai.

PRO TIPS FOR BETTER IMAGES

- Run the same prompt 2-4 times — each generation looks different, pick the best
- Strong art styles like Chibi and Ghibli can override your color palette — use Hyper-Realistic for precise color control
- High Precision mode adds extra anatomy constraints for the cleanest results
- Poster Art render mode produces the most dramatic compositions

06

Using Your Outputs

Every output and exactly where to use it.

TikTok & Instagram

Copy the Caption + Hashtags output and paste directly into your post. The caption includes a cinematic intro, an engagement question to drive comments, and optimized hashtags. No editing needed — ready to post.

For best results: post your AI-generated character image with the caption. The image does the visual work, the caption drives engagement.

CapCut — Video Creation

Use the Video Script output as your guide in CapCut. The script gives you a hook, a middle section, and an ending beat. Use it as text overlays on your character image, a voiceover script, or a structure for an AI video.

No face or voice needed. A screen recording of STARFORGE generating a character with text overlays is compelling content on its own.

Suno — Music Generation

Go to suno.com, create a free account, and paste the Suno Music Prompt into the prompt field. Suno generates a custom track that matches your character's mood and energy. Use it as background music for your TikTok or Reel.

Pika & Runway — AI Video

Use the AI Video Prompt in Pika (pika.art) or Runway (runwayml.com) to animate your character image. The prompt is formatted as a continuous cinematic motion sequence — camera movement, character action, atmosphere.

Fan Fiction & Creative Writing

The Character Lore, Cinematic Scene, Ally/Rival, and Story Arc outputs are your starting point for deeper creative work. Use them as the foundation for a full fan fiction story, a series of social posts that reveal your character over time, or a pitch for a creative project.

07

Forge Your Card

Turn your character into a collectible card — The Forged Collection.

HOW TO FORGE YOUR CARD

1. Generate your character in STARFORGE
2. Get your character image from ChatGPT or another AI image tool
3. Scroll down to the Forge Your Card section
4. Click the upload area and select your character image
5. Your card generates automatically
6. Creator subscribers — click Download Card to save your PNG

TIPS FOR THE BEST CARD

- A transparent or clean solid-color background produces the best card result
- Portrait orientation images work best — square or landscape gets cropped
- High resolution images produce sharper cards
- The card automatically applies your character's faction colors based on their role
- The card is generated at 2x resolution for crisp display on retina screens

FREE VS CREATOR CARD

Free users

Can preview their card with a STARFORGE watermark.

Creator subscribers — Full card, no watermark, full PNG download. The card is yours to share, post, or print.

08

Free vs Creator

Everything included in each tier.

FREE

Always available — no account required

- Full generator — all fields, all options
- AI Image Prompt
- Caption + Hashtags
- Suno Music Prompt
- Forge Your Card — watermarked preview
- 20 themed presets
- Character showcase

CREATOR — CA\$8/MONTH

7-day free trial — cancel anytime

- **Everything in Free, PLUS:**
- Video Script
- AI Video Prompt
- Character Lore — AI written
- Cinematic Scene — AI written
- Ally / Rival — AI written
- Story Arc — AI written
- Full Forge Your Card — no watermark
- Regenerate any AI output independently

Creator is billed at CA\$8/month after the 7-day free trial. Cancel anytime — no commitment, no contract. Your access continues until the end of your billing period.

09 Pro Tips

Get the most out of every generation.

ART STYLE GUIDE

Hyper-Realistic

Most cinematic, best for poster-style characters, gives precise color control

3D Render

Clean, polished, great for character card use

Ghibli-Inspired

Soft, painterly, warm — overrides color palette

Chibi

Stylized, cute, fun — overrides color palette

Retro 80s / 90s

Nostalgic, grainy, great for smuggler and bounty hunter characters

Painterly Matte Art

Classic concept art feel, great depth and texture

Comic Book

Bold lines, flat colors, great for action poses

LIGHTING GUIDE

Dark Cinematic

Dramatic shadows, villain energy

High Contrast

Sharp separation, heroic presence

Golden Hour

Warm, cinematic, hero's journey feel

Neon Glow

Cyberpunk energy, underworld characters

Foggy Atmospheric

Mysterious, mystical characters

Harsh Desert Sun

Rugged, survivor energy

CONTENT CREATION COMBOS

- AI Image Prompt + ChatGPT = your character image
- Character image + Caption + Hashtags = TikTok or Instagram post ready in minutes
- Character image + Forge Your Card = a collectible to share with the community
- Lore + Scene + Story Arc = the foundation for a full fan fiction story
- AI Video Prompt + Pika or Runway = an animated character clip
- Suno Music Prompt + Suno.com = a custom soundtrack for your content

10 FAQ

Common questions answered.

Do I need an account to use STARFORGE?

No — you can generate characters and use the three free outputs without creating an account. An account is only required to access the Creator tier.

What does the Creator plan include?

Creator unlocks 6 additional AI-powered outputs, full Forge Your Card downloads, and the ability to regenerate AI outputs independently. Billed at CA\$8/month after a 7-day free trial.

Can I cancel my subscription?

Yes — cancel anytime. No commitment, no contract. Your access continues until the end of your billing period.

Which AI image tool should I use?

ChatGPT produces the best overall results with STARFORGE prompts. Run the same prompt 2-4 times and pick the best result.

How do I get a transparent background?

STARFORGE prompts request a bright green background for easy removal in Canva. For a true transparent PNG without removal: use Adobe Firefly or Leonardo.ai.

Can I use my STARFORGE characters commercially?

STARFORGE generates original characters — they are your creative work. Always check the terms of service of the AI image tool you use to generate the actual image.

Are the generated characters Star Wars IP?

No — STARFORGE generates completely original characters. All species, planet, weapon, and role descriptions use original IP-safe language. No existing Star Wars characters are reproduced.

Why does the AI Lore say something different each time?

Character Lore, Cinematic Scene, Ally/Rival, and Story Arc call Claude AI directly. Every generation produces genuinely unique content. Use the Regenerate button to get a fresh version of any single output.

What is Forge Your Card?

A collectible card generator. Upload your AI-generated character image and STARFORGE builds a premium card with your character's details, faction badge, and the STARFORGE wordmark. Full download for Creator subscribers.

10 FAQ — continued

Is STARFORGE available as a mobile app?

STARFORGE is a web app accessible from any browser on any device. On iPhone, open it in Safari, tap Share, and tap Add to Home Screen to install it like a native app.

Is STARFORGE available in French?

Yes — STARFORGE is fully available in French. Use the EN · FR toggle at the top of the page to switch languages. The 4 AI narrative outputs (Lore, Scene, Ally/Rival, Story Arc) are written by Claude in French at the same quality as English. Image prompts stay in English for better results with AI image tools.

I found a bug or have feedback — how do I reach you?

Email feedback@starforgeapp.com — every message goes directly to the creator.
